Feb 16 2016 1:50PM  
warm transfer

*Hx: Caller states that he was using the product in a plastic flower waterer with water 6 hours go. He was using his right hand to pour the product. A few minutes ago he noticed that between his L hand thumb and index finger is swollen and red. After using the product and being outside caller washed his hands and then took a shower. He did not noticed any of the diluted product getting onto himself.*

由 此 可 見 本 報 之 功 用 實 不 淺 矣

Feb 18 2016 9:01AM

*Cb to caller. He went to ED after speaking with us. He was prescribed 500mg cephalexin and Cadista. He thinks his sxs are improving, although the hand is still swollen. He is going to f/u with his PMD today. Asked what he was diagnosed with and what treating MD thought cause was, but he states he has given all of that information to his MD and does not share.*

A: Advised we may f/u with him again a few days to see how he is doing. Cb prn.
